

Friday 22 May

	Breakout rooms					Interop room			Classroom										
Room #	14	13	15	16	17	24	23	22	19	20	21								
	100 seats	24 seats	10 seats each			30 seats	40 seats	20 seats	15 seats	15 seats	40 seats								
9:00												9:00							
9:15	Arriving at venue - Butter croissants and cinnamon rolls in break room											9:15							
9:30	project culture: empowering contributors and maintainers <i>David Wood & Niko</i>				Pin Projections, Field Projections, Custom Reborrows. ...	Rust/C++ Interop: Moving from Problem Statements to Solutions <i>Teor</i>			Should the infra team have a common GitHub client? <i>Marco</i>	Discuss how infra team can inform about best practices <i>Marco</i>		9:30							
9:45												improving SIMD <i>Folkert</i>	Should the infra team have a common GitHub client? <i>Marco</i>	Discuss how infra team can inform about best practices <i>Marco</i>	Supporting rustc-based Code Augmentation Tools: Existing Challenges and Possible Solutions <i>Zalán</i>	9:45			
10:00																Finalizing validity invariants: unions <i>Ralf</i>	Infra team planning <i>Marco</i>	Supporting rustc-based Code Augmentation Tools: Existing Challenges and Possible Solutions <i>Zalán</i>	10:00
10:15																			10:15
10:30	Iterating on Cargo and rustc's diagnostic output <i>Ed</i>											10:30							
10:45												10:45							
11:00												11:00							
11:15												11:15							
11:30												11:30							
11:45												11:45							
12:00	Open Source Moderation Panel Discussion <i>Oli & Q</i>	Status and next steps of Cargo trim-paths feature <i>Urgau</i>								Infra team planning <i>Marco</i>	Supporting rustc-based Code Augmentation Tools: Existing Challenges and Possible Solutions <i>Zalán</i>	12:00							
12:15												12:15							
12:30												12:30							
12:45												12:45							
13:00												13:00							
13:15	Lunch in break room or outdoor											13:15							
13:30	Bread with dips, Indonesian marinated chicken satay, fish/veggi burgers, Indian vegan curry											13:30							
13:45												13:45							
14:00	North stars, roadmaps, and cross-cutting questions <i>Niko</i>	Clippy Team room <i>Flip</i>				Default auto traits and bounds <i>Yosh</i>	Crubit (Google's C++ interop tool) updates and challenges in 2026 <i>Taylor</i>			Should we have an official setup-rust GitHub Action? <i>Marco</i>	How to prevent pointers to fields of an enum from changing the active variant <i>Ralf</i>	Binary Size <i>Nia</i>	14:00						
14:15													14:15						
14:30													14:30						
14:45													14:45						
15:00												15:00							
15:15												15:15							
15:30												15:30							
15:45												15:45							
16:00												16:00							
16:15												16:15							
16:30												16:30							
16:45												16:45							
17:00												17:00							
17:15												17:15							
17:30												17:30							
17:45												17:45							
18:00	Drinks in break room or outdoor											18:00							
18:15	Busses departing at 17:30 & 18:30											18:15							
18:30												18:30							

Saturday 23 May

	Plenary room					Breakout rooms			Interop room			Classroom										
Room #	14	13	15	16	17	24	23	22	19	20	21											
	100 seats	24 seats	10 seats each			30 seats	40 seats	20 seats	15 seats	15 seats	40 seats											
9:00												9:00										
9:15	Arriving at venue - Butter croissants and raspberry croissants in break room											9:15										
9:30	Money: It's what I want Niko	Unifying design of Rust websites Guillaume				State of Allocators Nia	Joint session with TC39 (JavaScript) Shane		Dictionary Passing Style Vision for the Type System Boxy	Terminology bikeshed: library UB? Safety invariant? Validity invariant? Ralf	Stability attribute reform Jacob	9:30										
9:45												9:45										
10:00												10:00										
10:15												10:15										
10:30												10:30										
10:45												10:45										
11:00	Where to go with the RFC process? Ed					State of Allocators Nia	Joint session with TC39 (JavaScript) Shane	In-Place Initialization Benno		Finalizing validity invariants: references Ralf		11:00										
11:15												11:15										
11:30												11:30										
11:45												11:45										
12:00												12:00										
12:15												12:15										
12:30												12:30										
12:45												12:45										
13:00												13:00										
13:15	Lunch in break room or outdoor											13:15										
13:30	Salads, potatoes, vegetables, corn-based ribs, quesadillas, chicken satay, smoked salmon, chicken sausages, spareribs											13:30										
13:45												13:45										
14:00	The shape of Rust Project security Adam Harvey	Standard library plans for the next edition Amanieu				Field Projections Benno	Rust for CPython and Rust/Python interop Emma		Const Generics Boxy	Types Team roadmap planning Icni		14:00										
14:15												14:15										
14:30												14:30										
14:45												14:45										
15:00												15:00										
15:15												15:15										
15:30	Closing - Mara											15:30										
15:45												15:45										
16:00												16:00										
16:15												16:15										
16:30	16:30																					
16:45	16:45																					
17:00	17:00																					
17:15	17:15																					
17:30												17:30										
17:45	Drinks in break room or outdoor											17:45										
18:00	Busses departing at 17:30 & 18:30											18:00										
18:15												18:15										
18:30												18:30
